A Brief History

Established in 1975, and based in Brimsdown, Enfield, Middx, **Shelmar Engineering** has provided engineering services to the Chemical, Pharmaceutical, Manufacturing and Construction Industries in the South East of England.

Working from our 10,000 sq ft factory, equipped with overhead cranes, we are capable of producing individual or mass produced items. Aluminium Handbarrows for local authority street cleansing departments are a recent addition to our manufacturing expertise.

Our skilled workforce manufacture to a very high standard in Mild Steel, Stainless Steel and Aluminium. We can install any item we make, plus on-site fabrications, pipe work, general maintenance and repairs as required. Our Fitter/Welders work to your instructions, Risk Assessments and Method Statements are submitted prior to commencement of works.

CAPABILITIES

Fabrications

All types of welded fabrications and ducting in Mild, Stainless Steel and Aluminiums up to 10 tonne per individual section. Cylindrical and rectangular pressure tested vessels, pans, tanks, steam coils are manufactured in house and fitted on site if required. General metalworks include balustrades, barriers, gates, steel cages, support frames, mezzanine floors, platforms, walkways, staircases and handrails. Again, all items are made in our workshop.

Site Installations

We employ permanent teams of site erectors capable of installing any items manufactured by our Company. Many have been with us for years so we may all benefit from the experience and willingness of our installers. We understand that large or small projects require our total commitment, and all of our staff are aware of this.

We supply to site, as required. Manufacture and install and assist wherever we can to make every job a success. Shelmar Engineering's dedication to all of our customers needs is a must and part of our employee training schemes.

Any alterations or design changes do happen, we understand that. We do our utmost to communicate with clients, architects and workforces to ensure all changes are completely understood by all.

CUSTOMER SERVICE

All of our staff are highly skilled, motivated and dedicated to our Customer Service. We strive to project manage every single job to completion and to ensure all aspects of the job are correct. Shelmar's success so far, has depended on each of our Customer's satisfaction.

DRAWING OFFICE

Drawings are prepared from site surveys, or from your dimensions, photos and CD's supplied. Customer approval is always required prior to any manufacturing.

FINISHING TOUCHES

What finishing standard is required? We have our own spray paint booth for a range of colours and specifications. If you're looking for Galvanising, Powder Coating, anodising or any other finish, we can organise that too. Goods are inspected, packed and delivered.

Recycling Centre

We manufactured for a local recycling centre, this painted cage from the drawings supplied. We followed up with an on site survey and guard handrail.

Tel: 0208 805 0373

Brent Cross Roof—Service access equipment

The handrails, steps and guarding were supplied and fitted earlier on this year, along with 2 other walkways.

www.shelmar.co.uk

Perimeter Security Gates

These security gates and perimeter fences were supplied and fitted to a day centre in London. The premises needed to be safe and secure for the center's staff and users.

Fax: 0208 443 1835

Mezzanine Floor

An extension to this building created the space for a steel mezzanine floor. We delivered to site and our erectors and engineers doubled the existing floor space for this Company.

**General Manager : Andy Batty
Shelmar Engineering Ltd**

Steel Access Walkway to Reactor

A Chemical processing plant in Suffolk needed their existing walkway replaced. We submitted drawings for approval prior to manufacture

0208 805 0373

Working at Height.

We assess and hire-in any access equipment to ensure all installations are fitted safely. We have trained slinger signaller/banksmen for crane work.

0208 805 0373

Handrails

Made in our factory and installed on-site. Finished as required and all works approved. What an improvement to the disabled access slope.

0208 208 0373

Staircases

This is the third flight of three supplied for a building refurbishment in Essex. Designed, manufactured and installed.

Mark Milson
Sales & Technical Manager
Shelmar Engineering Ltd

Shelmar Engineering is only as successful as we are due to the loyalty of our staff and our level of Customer Service. We always ensure that all jobs are completed with the utmost care and respect.
